

I'm writing in regards to giving LPFM priority over existing high power FM stations. I am a listener of K-LOVE in the Raleigh, NC area at FM frequency 106.7. This station is very valuable to me and I do not want to lose it through interference of other stations. I have lived in the area for over 15 years. K-LOVE provides professional, contemporary Christian programming which hasn't been matched by other Christian stations operating in the area. Many people listen to K-LOVE based upon feedback from a local concert. Prior to K-LOVE broadcasting in the Raleigh area, contemporary Christian music had limited availability in the area. FM radio is more appealing now that K-LOVE is available. I would like for the K-LOVE signal to be stronger than it is. Allowing LPFM to take priority would be exactly opposite of what I would like to happen in North Carolina. Please protect K-LOVE from other radio interference.

Sincerely,

Dennis Doidge
